Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE

WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

Data Collection

The 2007 National Home and Hospice Care Survey, one of the National Health Care Surveys, collected medication data (in the Patient Health module) on sampled current home health care patients and sampled hospice care discharges for the first time in the survey's history. Up to 10 current home health care patients/hospice care discharges were sampled in each agency. Using information in current home health care patient/hospice care discharge medical records, the designated agency respondent answered the following medication-related question (item PH76 in the patient health module) asked about each sampled current home health care patient/hospice care discharge:

- For current home health care patients: *What are the names of all the medications and drugs he/she is currently taking? Please include any standing, routine, or PRN medications.*
- For hospice care discharges: *What are the names of all the medications and drugs he/she was taking the seven days prior to and on the day of his/her discharge/death? Please include any standing, routine, or PRN medications.*

Only the medication name—brand name or generic name, whichever was provided—was collected. Information on dosage, strength, route, and frequency of administration was not collected. The computer-assisted personal interviewing (CAPI) instrument allowed the interviewer to enter up to 25 medication names.

A drug look-up table within the CAPI instrument facilitated the entry of medication data. The interviewer's keystrokes automatically scrolled to the medication names beginning with the first letters entered. Although not every medication was in the look-up table, many medications commonly prescribed in home health and hospice care settings were in the table.

Medication Coding

The medication data collected in item PH76 of the 2007 NHHCS have been coded, using a unique classification scheme developed by NCHS. This in-house coding system uses a five-digit coding scheme (i.e., PMCODE1B through PMCODE25B in the public-use file), which is updated regularly to include new products. It also includes a special code, 90000, for non-medications. An example of a non-medication is a glucose strip to test for blood glycemic level. Additionally, the medications reported in the 2007 NHHCS have been assigned therapeutic classification codes according to the Multum system, which is described in the next section.

When the interviewer came across a medication that was not in the look-up table, the medication was entered into the "Other, Specify" field. When data collection was completed, the contractor matched the "Other, Specify" entries with medications in the NCHS in-house coding system database to see if an exact match existed. If an exact match was found, the "Other, Specify" entry was coded accordingly. Drug entries without an exact match were sent in a list of "Other, Specify" medications to NCHS, where the medications were assigned a unique NCHS drug code. Medications that were not understandable and, therefore, were not coded by NCHS were assigned the code 99980 (uncodable).

Lists of the medications taken by the sampled current home health care patients/hospice care discharges accompany these technical notes on the NHHCS web page. Further details about these spreadsheets are discussed in the section, Supplemental Drug Information.

The Medication Public-use File

The medication public-use file contains not only drug name codes but also drug characteristics, which are discussed in more detail in the following pages. The medication file contains 9,416 records on 4,683 current home health care patients and on 4,733 hospice care discharges. There is one record for each sampled home health patient/hospice discharge. Each record contains 534 variables. Each record has a home health care patient/hospice care discharge record number (PATNUM), the agency record number (PTAGYNUM), the drug name codes for each medication taken by the patients/discharges (i.e., PMCODE1B through PMCODE25B, which are the drug name codes for the medications reported to the interviewer at the time of the survey), and the drug characteristics listed below for each medication.

a. **Generic drug code (variable label root is DRUGID):** Drugs are coded in terms of their generic components and therapeutic classifications using Lexicon Plus®, a proprietary database of Cerner Multum, Inc., also used by the National Ambulatory Medical Care Survey, the National Hospital Ambulatory Medical Care Survey, and the National Health and Nutrition Examination Survey, NCHS. The Lexicon Plus is a comprehensive database of all prescription and some nonprescription drug products available in the U.S. drug market.

In accordance with the Multum Lexicon End-User License Agreement (see Appendix I), NCHS publications, tabulations, and software applications should cite the Multum Lexicon as the source and basis for the coding and classification of NHHCS drug data. For additional information on the Multum Lexicon Drug Database, please refer to the following Web site: <http://www.multum.com/Lexicon.htm>.

All drug codes based on entry name (using NCHS' classification system discussed previously) were also assigned a unique generic drug code from Multum's Lexicon Drug Database where possible. The structure of the Multum database is such that multiple ingredient drugs are assigned a single generic drug code, encompassing all of a drug's ingredients rather than being assigned generic drug codes for each ingredient, as was done for the 2004 National Nursing Home Survey (NNHS), using the National Drug Code classification system.

For example, in the 2004 NNHS, Tylenol No. 3 was assigned a drug entry code of 32920 to reflect the entry of Tylenol No. 3. Using the NCHS generic classification, it was also given a code of 51380 in the generic code field to represent a combination product, and then received separate ingredient codes for acetaminophen and codeine. Under Multum, there is a single generic code that reflects the combination of acetaminophen with codeine: d03423.

The format of the generic drug code—DRUGID—is a 6-digit numeric code, beginning with the letters “a”, “c” or “d”. All Multum codes begin with the letter “d”, but there were some drug names reported by NHHCS participants that were not found in the Multum Lexicon Drug Database. These have been assigned unique drug codes beginning with an “a” where a drug's ingredients could be determined, or a “c” in the case where a drug's ingredients could not be determined. The variables DRUGID1 through DRUGID25 reflect the generic codes for each drug reported in the survey.

b. **Prescription status code (variable label root is PRESCR):** A code designed to identify the legal status (prescription or nonprescription) of the drug entry.

c. **Controlled substance status code (variable label root is CONTSUB):** A code used to denote the degree of potential abuse and federal control of a drug entry.

d. **Composition status code (variable label root is COMSTAT):** A code used to distinguish between single-ingredient and combination drugs.

e. **Therapeutic category code (variable label root is RXCAT):** A code, based on the Multum Lexicon, used to identify the therapeutic class(es) to which a drug ingredient belongs. The Multum Lexicon provides a three-level nested category system that assigns a therapeutic classification to each drug and each ingredient of the drug (e.g., for naproxen: the broadest category is central nervous system agents [level 1]; the more detailed category is analgesics [level 2]; and the most detailed category is nonsteroidal anti-inflammatory agents [level 3]). Not all drugs have three classification levels; some may only have two [e.g., for digoxin: cardiovascular agents [level 1]; inotropic agents [level 2]], while others only have one. See Appendix II for the complete Multum category levels.

Each DRUGID can have up to four drug (i.e., therapeutic) categories. The variables RX1CAT1 through RX25CAT4 reflect the unique Multum drug categories for a particular drug; these are character values with codes from 001 through 899. **The RXCAT variables will always show the most detailed therapeutic level available of a particular drug.** For example, psychotherapeutic agents in Multum are further classified into a second more detailed level, as antidepressants or antipsychotics. Antidepressants are further classified into seven subcategories (i.e., miscellaneous antidepressants, SSRI antidepressants, tricyclic antidepressants, monoamine oxidase inhibitors, phenylpiperazine antidepressants, tetracyclic antidepressants, and SSNRI antidepressants); antipsychotics are further classified into five subcategories. A drug categorized as a tetracyclic antidepressant would have a drug category code of 307, reflecting the Level 3 code.

Other drugs may have only two levels available, such as immunologic agents. There are eight Level 2 categories of immunologic agents, and no further breakdowns into a third level in the Multum system. Therefore, RX1CAT1 would reflect only a second level code in that case. So, using RX1CAT1–RX25CAT4 will allow one to identify the most specific level of a drug, but **will not, by itself, identify whether that code reflects the first, second, or third level.**

In order to understand each level of the Multum hierarchy, the file contains additional variables that show the full first, second, and third levels, if applicable, for each drug category for each drug. For example, the tetracyclic antidepressant Remeron (PMCODE=157), whose generic name is mirtazapine (DRUGID=d04025), has the code RX1CAT1=307. But there are three additional variables corresponding to that drug's first therapeutic category. RX1V1C1 (meaning Drug 1, Level 1 of Therapeutic Category 1) would be 242 (psychotherapeutic agents), RX1V2C1 (Drug 1, Level 2 of Therapeutic Category 1) would be 249 (antidepressants), and RX1V3C1 (Drug 1, Level 3 of Therapeutic Category 1) would be 307 (tetracyclic antidepressants). If there was no second or third level for a particular category, the entry would be blank (). This is repeated for each of the drug's maximum of four therapeutic categories. The three levels can easily be concatenated by data users if they wish to obtain a complete code showing the full level structure applicable to each drug's therapeutic categories. An advantage of having separate levels is that it allows data users to aggregate drugs at any level desired.

All drugs were coded using Multum drug categories, even those drugs not found in Multum's drug database. "Unspecified" drugs were assigned to their respective therapeutic category (e.g., hormones – unspecified: category id=097, category name=hormones). Drugs that could not be assigned to any drug entry name (code=99980) were not assigned a therapeutic drug category. **In some cases, NCHS was able to categorize a drug's therapeutic class at the first or second Multum level, but not at the more detailed level. When this occurred, the undetermined level is designated as 999 in the data.**

Multum uses a "combination" category for some multiple ingredient drugs. These include antihypertensive combinations, antiasthmatic combinations, upper respiratory combinations, psychotherapeutic combinations, bronchodilator combinations, sex hormone combinations, skeletal muscle relaxant combinations, and narcotic analgesic combinations. This categorization may be sufficient for certain analyses but not for others because it lacks information about the therapeutic effect of the individual ingredients that make up the combination. For example, the drug hydrochlorothiazide; losartan is identified as an antihypertensive combination. Therefore, we know that this drug has an antihypertensive drug effect. However, based on this combination category we do not know that the drug's single ingredients have the therapeutic effects of a diuretic and angiotensin II inhibitor, which is relevant for some analyses. It is best to search for these drugs individually in the list of generic names provided (i.e., *Generic Names and Multum Drug Categories for Medications Taken by Current Home Health Care Patients* and *Generic Names and Multum Drug Categories for Medications Taken by Hospice Care Discharges*), which are discussed in the Supplemental Drug Information section, to find out if they are listed. If they are not listed in these files, then you should contact the Long-Term Care Statistics Branch at NCHS at (301) 458-4747 to request that information.

In the case of single ingredient drugs, the therapeutic categories are the same as the therapeutic categories for the drug name entered into the CAPI system, which is identified by PMCODE1B through PMCODE25B in the public-use file.

Naming Convention for Medication Variables

The naming convention for the medication variables in the public-use file is provided below to orient the data user to the many medication variables that are similar, but different, in the public-use file. The variable labels for the medications often differ by just a few numbers. The variable labels for the first medication in the public-use file is shown below and on the next page, along with the response options, which apply to the remaining variables in the medication file. The variable labels for medication #2 are also provided below. The remaining variable labels are provided in the data dictionary found at

ftp://ftp.cdc.gov/pub/Health_Statistics/NCHS/Dataset_Documentation/NHHCS/2007.

[PMCODE1B] MEDICATION #1

00001-99227 = 00001-99227

90000 = non-medication

[DRUGID1] DRUG ID

a10001-a71037 = NCHS code (for drugs not found in Multum but for which ingredients could be determined)

c00012-c00899 = NCHS code (for drugs not found in Multum and with undetermined ingredients)

d00001-d06848 = Multum code

[PRESCR1] PRESCRIPTION STATUS CODE

- 1 = Prescription Drug
- 2 = Nonprescription Drug
- 3 = Undetermined

[CONTSUB1] CONTROLLED SUBSTANCE STATUS CODE

- 1 = Schedule I (Research Only)
- 2 = Schedule II 5 = Schedule V
- 3 = Schedule III 6 = No Control
- 4 = Schedule IV 7 = Undetermined

[COMSTAT1] COMPOSITION STATUS CODE

- 1 = Single Entity Drug
- 2 = Combination Drug
- 3 = Undetermined

[RX1CAT1] MULTUM DRUG CATEGORY # 1

Reflects the most detailed therapeutic level to which the drug can be classified. For some drugs, Multum Level 1 (broadest level) is the most detailed, while others can be coded to Level 2, but the majority can be coded to Level 3 (most detailed level). For more on the Multum classification system, please see the discussion about therapeutic category codes in the previous section. The complete Multum Classification Directory is shown in Appendix II.

- “ “ = Blank/Not applicable
- 001–899 = Drug category
- 999 = Undetermined category

[RX1V1C1] Level 1 of MULTUM DRUG CATEGORY # 1

[RX1V2C1] Level 2 of MULTUM DRUG CATEGORY # 1

[RX1V3C1] Level 3 of MULTUM DRUG CATEGORY # 1

[RX1CAT2] MULTUM DRUG CATEGORY # 2

See RX1CAT1.

[RX1V1C2] Level 1 of MULTUM DRUG CATEGORY # 2

[RX1V2C2] Level 2 of MULTUM DRUG CATEGORY # 2

[RX1V3C2] Level 3 of MULTUM DRUG CATEGORY # 2

[RX1CAT3] MULTUM DRUG CATEGORY # 3

See RX1CAT1.

[RX1V1C3] Level 1 of MULTUM DRUG CATEGORY # 3

[RX1V2C3] Level 2 of MULTUM DRUG CATEGORY # 3

[RX1V3C3] Level 3 of MULTUM DRUG CATEGORY # 3

[RX1CAT4] MULTUM DRUG CATEGORY # 4

See RX1CAT1.

[RX1V1C4] Level 1 of MULTUM DRUG CATEGORY # 4

[RX1V2C4] Level 2 of MULTUM DRUG CATEGORY # 4

[RX1V3C4] Level 3 of MULTUM DRUG CATEGORY # 4

NAMING CONVENTION FOR MEDICATION #2

[PMCODE2B] MEDICATION #2

[DRUGID2] DRUG ID

[PRESCR2] PRESCRIPTION STATUS CODE

[CONTSUB2] CONTROLLED SUBSTANCE STATUS CODE

[COMSTAT2] COMPOSITION STATUS CODE

[RX2CAT1] MULTUM DRUG CATEGORY # 1

[RX2V1C1] Level 1 of MULTUM DRUG CATEGORY # 1

[RX2V2C1] Level 2 of MULTUM DRUG CATEGORY # 1

[RX2V3C1] Level 3 of MULTUM DRUG CATEGORY # 1

[RX2CAT2] MULTUM DRUG CATEGORY # 2

[RX2V1C2] Level 1 of MULTUM DRUG CATEGORY # 2

[RX2V2C2] Level 2 of MULTUM DRUG CATEGORY # 2

[RX2V3C2] Level 3 of MULTUM DRUG CATEGORY # 2

[RX2CAT3] MULTUM DRUG CATEGORY # 3

[RX2V1C3] Level 1 of MULTUM DRUG CATEGORY # 3

[RX2V2C3] Level 2 of MULTUM DRUG CATEGORY # 3

[RX2V3C3] Level 3 of MULTUM DRUG CATEGORY # 3

[RX2CAT4] MULTUM DRUG CATEGORY # 4

[RX2V1C4] Level 1 of MULTUM DRUG CATEGORY # 4

[RX2V2C4] Level 2 of MULTUM DRUG CATEGORY # 4

[RX2V3C4] Level 3 of MULTUM DRUG CATEGORY # 4

Supplemental Drug Information

The documentation for the medication public-use file contains crude estimates for drugs reported in the 2007 NHHCS. A spreadsheet consisting of four tabs with information on these drugs is available at <http://www.cdc.gov/nchs/nhhcs.htm> and the tabs are labeled as follows:

- *Drug Characteristics and Estimates for Medications Taken by Current Home Health Care Patients in 2007 NHHCS* lists the drug name code (PMCODE, which is the name of the medication that was reported at the time of survey), drug name, composition status code (COMSTAT), prescription status code (PRESCR), DEA status code (CONTSUB), unweighted* number of drug mentions (in the 2007 NHHCS), weighted** number of drug mentions (in the 2007 NHHCS), rate per 10,000 home health patients (in the 2007 NHHCS).
- *Generic Names and Multum Drug Categories for Medications Taken by Current Home Health Care Patients in 2007 NHHCS* lists drugs by generic or ingredient name (DRUGID) and provides the Multum therapeutic class code(s) for the generic/ingredient name (RXCAT).

- *Drug Characteristics and Estimates for Medications Taken by Hospice Care Discharges in 2007 NHHCS* lists the drug name code (PMCODE, which is the name of the medication that was reported at the time of survey), drug name, composition status code (COMSTAT), prescription status code (PRESCR), DEA status code (CONTSUB), unweighted* number of drug mentions (in the 2007 NHHCS), weighted** number of drug mentions (in the 2007 NHHCS), rate per 10,000 hospice discharges (in the 2007 NHHCS).
- *Generic Names and Multum Drug Categories for Medications Taken by Hospice Care Discharges in 2007 NHHCS* lists drugs by generic or ingredient name (DRUGID) and provides the Multum therapeutic class code(s) for the generic/ingredient name (RXCAT).

*According to NCHS guidelines, unweighted estimates based on fewer than 30 sample cases are not reported. Estimates based on 30–59 cases or on 60 or more cases and a relative standard error (RSE) of 30% or more are reported but should not be assumed reliable. Estimates based on 60 or more cases and an RSE less than 30% are reported and are considered reliable.

**These weighted numbers, which are weighted for the inverse of the probability of selection, will differ slightly from the weighted numbers obtained using the public-use file.

Recodes

An additional variable was created and added to the medication public-use file after data collection was completed: TOTALRX. This variable provides the total number of medications taken by the sampled patient/discharge. The valid range for RXTOTAL is 0 to 25. There were 80 current home health patients for whom medication information was not ascertained and 7 current home health patients for whom medication information was refused. There were 65 hospice discharges for whom medication information was not obtained.

Downloading the Medication Public-use File

The SAS and ASCII versions of the medication public-use file can be accessed at ftp://ftp.cdc.gov/pub/Health_Statistics/NCHS/Datasets/NHHCS/2007 and downloaded. Also available at this website are the following documents: medication public-use file data dictionary, SAS, SPSS and STATA input statements and variable labels, medication name and generic name label statements for the medications reported in the survey, and format statements for the Multum categories.

Linking the Medication Public-use File to the Patient/Discharge Public-use File

The analytic value of the medication public-use file is maximized when the medication file is linked to the patient/discharge file (by PATNUM), which contains demographic information, health status information, and information on the services obtained by the current home health care patients/hospice care discharges. (The patient/discharge file data dictionary can be accessed at

ftp://ftp.cdc.gov/pub/Health_Statistics/NCHS/Dataset_Documentation/NHHCS/2007/PatientPUF_DataDictionary_2007NHHCS.pdf.)

The following SAS code shows how to link the medication file to the patient/discharge file, using the PATNUM variable.

```
LIBNAME patient 'filepath'; /*patient*/
LIBNAME meds 'filepath'; /*medication*/
data meds; set meds.file_name; run;
data patient; set patient.file_name; run;
```

```

proc sort data=meds; by patnum;
proc sort data=patient; by patnum;

data merged;
merge meds patients(in=patient.file_name keep=[list variables to include in
analysis, including agtype own chain pstrata poppat popagn samwt];
by patnum;

```

Analyzing the Medication Data Using SAS and SUDAAN

To explore the characteristics of the current home health care patients/hospice care discharges who took a specific therapeutic subclass, NCHS recommends analyzing the data at the DRUGID level. This can be done by running an array, similar to the one below, to create a file of the current home health care patients/hospice care discharges who took the subclass of interest. This example provides code to find current home health patients/hospice care discharges who took cephalosporins, which is a subclass of anti-infectives. The Multum category IDs for cephalosporins are 159 (first generation), 160 (second generation), 161 (third generation), 162 (fourth generation), and 379 (next generation). This code will create a data set of the current home health care patients/hospice care discharges who took one or more medications that are assigned to these therapeutic subclasses. **Analyses for current home health care patients and hospice care discharges must be conducted separately to obtain correct estimates for each group.**

```

LIBNAME LIBRARY 'filepath'; *format library;
LIBNAME meds 'filepath'; /*medication*/
LIBNAME patient 'filepath'; /*patient*/

data meds; set meds.file_name; run;
data patient; set patient.file_name; run;

discharges*/
class sex subcat;
tables sex * subcat;
test chisq llchisq;
output / filename = z1 replace tablecell = default; run;

```

Contact information:

For technical assistance with the 2007 NHHCS medication file, contact the Long-term Care Statistics Branch at (301) 458-4747. Our website can be accessed at <http://www.cdc.gov/nchs/nhhcs.htm>.

An NCHS methods report on the redesign and operations of the 2007 NHHCS will be available in the near future.

Appendix I: Multum Lexicon End-User License Agreement

1. Introduction

A. This License Agreement (the "License") applies to the Multum Lexicon database (the "Database"). This License does not apply to any other products or services of Cerner Multum, Inc. ("Multum"). A "work based on the Database" means either the Database or any derivative work under copyright law; i.e., a work containing the Database or a substantial portion of it, either verbatim or with modifications. A translation of the Database is included without limitation in the term "modification". Each end-user/licensee is addressed herein as "you".

B. Your use of the Database acknowledges acceptance of these restrictions, disclaimers, and limitations. You expressly acknowledge and agree that Multum is not responsible for the results of your decisions resulting from the use of the Database, including, but not limited to, your choosing to seek or not to seek professional medical care, or from choosing or not choosing specific treatment based on the Database.

C. Every effort has been made to ensure that the information provided in the Database is accurate, up-to-date, and complete, but no guarantee is made to that effect. In addition, the drug information contained herein may be time sensitive.

D. Multum does not assume any responsibility for any aspect of healthcare administered or not administered with the aid of information the Database provides.

2. Terms and Conditions for Copying, Distribution and Modification

A. You may copy and distribute verbatim copies of the Database as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Database a copy of this License (the readme.txt file) along with the Database and anything else that is part of the package, which should be identified.

B. You may modify your copy or copies of the Database or any portion of it to form a derivative work, and copy and distribute such modifications or work under the terms of Section 2.A. above, provided that you also meet all of these conditions:

i) You must cause the modified files to carry prominent notices stating that they are derived from the Multum Lexicon database from Cerner Multum, Inc. and that you changed the files and the date of any change(s).

ii) If you incorporate modified files into a computer program, you must cause it, when started running for interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice, a notice that you have modified the Multum Lexicon database from Cerner Multum, Inc., and a notice that there is no warranty (or that you provide the warranty) and telling the user how to view a copy of this License.

C. It is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Database.

D. You may copy and distribute the Database (or a work based on it, under Section 2.B.) in an encoded form under the terms of Sections 2.A. and 2.B. above provided that you also do one of the following:

- i) Accompany it with the complete corresponding machine-readable plain text, which must be distributed under the terms of Sections 2.A and 2.B. above on a medium customarily used for software interchange; or,
- ii) Accompany it with a written offer to give any third party, for no charge, a complete machine-readable copy of the Database (and the entirety of your derivative work based on it, under Section 2.B.), to be distributed under the terms of Sections 2.A. and 2.B. above on a medium customarily used for software interchange.

E. You may not copy, modify, sublicense, or distribute the Database except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Database will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

F. You are not required to accept this License. However, nothing else grants you permission to copy, modify or distribute the Database or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by copying, modifying or distributing the Database (or any work based on the Database), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Database or works based on it.

G. Each time you redistribute the Database (or any work based on the Database), the recipient automatically receives a license from Multum to copy, distribute or modify the Database subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

3. Disclaimer of Warranties; Limitation of Damages

A. BECAUSE THE DATABASE IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM OR DATA, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING. MULTUM AND/OR OTHER PARTIES PROVIDE THE DATABASE "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED, STATUTORY OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE DATABASE IS WITH YOU. SHOULD THE DATABASE PROVE DEFECTIVE, INCOMPLETE, OR INACCURATE, YOU ASSUME THE RESPONSIBILITY AND COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

B. IN NO EVENT (UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING) WILL MULTUM, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE DATABASE AS PERMITTED ABOVE, BE LIABLE FOR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR INDIRECT DAMAGES, INCLUDING DAMAGES FOR LOSS OF PROFITS, LOSS OF BUSINESS, OR DOWN TIME, EVEN IF MULTUM OR ANY OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

C. IN ADDITION, WITHOUT LIMITING THE FOREGOING, THE DATABASE HAS BEEN DESIGNED FOR USE IN THE UNITED STATES ONLY AND COVERS THE DRUG PRODUCTS USED IN PRACTICE IN THE UNITED STATES. MULTUM PROVIDES NO CLINICAL INFORMATION OR CHECKS FOR DRUGS NOT AVAILABLE FOR SALE IN THE UNITED STATES AND CLINICAL PRACTICE PATTERNS OUTSIDE THE UNITED STATES MAY DIFFER SUBSTANTIALLY FROM INFORMATION SUPPLIED BY THE DATABASE. MULTUM DOES NOT WARRANT THAT USES OUTSIDE THE UNITED STATES ARE APPROPRIATE.

D. You acknowledge that updates to the Database are at the sole discretion of Multum. Multum makes no representations or warranties whatsoever, express or implied, with respect to the compatibility of the Database, or future releases thereof, with any computer hardware or software, nor does Multum represent or warrant the continuity of the features or the facilities provided by or through the Database as between various releases thereof.

E. Any warranties expressly provided herein do not apply if: (i) the end-user alters, mishandles or improperly uses, stores or installs all, or any part, of the Database, (ii) the end-user uses, stores or installs the Database on a computer system which fails to meet the specifications provided by Multum, or (iii) the breach of warranty arises out of or in connection with acts or omissions of persons other than Multum.

4. Assumption of Risk, Disclaimer of Liability, Indemnity

A. THE END-USER ASSUMES ALL RISK FOR SELECTION AND USE OF THE DATABASE AND CONTENT PROVIDED THEREON. MULTUM SHALL NOT BE RESPONSIBLE FOR ANY ERRORS, MISSTATEMENTS, INACCURACIES OR OMISSIONS REGARDING CONTENT DELIVERED THROUGH THE DATABASE OR ANY DELAYS IN OR INTERRUPTIONS OF SUCH DELIVERY.

B. THE END-USER ACKNOWLEDGES THAT MULTUM: (A) HAS NO CONTROL OF OR RESPONSIBILITY FOR THE END-USER'S USE OF THE DATABASE OR CONTENT PROVIDED THEREON, (B) HAS NO KNOWLEDGE OF THE SPECIFIC OR UNIQUE CIRCUMSTANCES UNDER WHICH THE DATABASE OR CONTENT PROVIDED THEREON MAY BE USED BY THE END-USER, (C) UNDERTAKES NO OBLIGATION TO SUPPLEMENT OR UPDATE CONTENT OF THE DATABASE, AND (D) HAS NO LIABILITY TO ANY PERSON FOR ANY DATA OR INFORMATION INPUT ON THE DATABASE BY PERSONS OTHER THAN MULTUM.

C. MULTUM SHALL NOT BE LIABLE TO ANY PERSON (INCLUDING BUT NOT LIMITED TO THE END-USER AND PERSONS TREATED BY OR ON BEHALF OF THE END-USER) FOR, AND THE END-USER AGREES TO INDEMNIFY AND HOLD MULTUM HARMLESS FROM ANY CLAIMS, LAWSUITS, PROCEEDINGS, COSTS, ATTORNEYS' FEES, DAMAGES OR OTHER LOSSES (COLLECTIVELY, "LOSSES") ARISING OUT OF OR RELATING TO (A) THE END-USER'S USE OF THE DATABASE OR CONTENT PROVIDED THEREON OR ANY EQUIPMENT FURNISHED IN CONNECTION THEREWITH AND (B) ANY DATA OR INFORMATION INPUT ON THE DATABASE BY END-USER, IN ALL CASES INCLUDING BUT NOT LIMITED TO LOSSES FOR TORT, PERSONAL INJURY, MEDICAL MALPRACTICE OR PRODUCT LIABILITY.

5. Miscellaneous

A. You warrant that you have authority within the organization you identified during registration for the Database to enter into license agreements with other organizations including Multum.

B. You agree that Multum may identify you and/or your organization by name as a "licensee", "licensed user", or "licensing organization" of the Database or a "client" of Multum in Multum's external market communications. You also agree that Multum may issue, if it desires, a press release stating that you and/or your organization have licensed the Database.

C. If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other obligations, then as a consequence you may not distribute the Database at all.

D. If any portion of this License is held invalid or unenforceable under any particular circumstance, the balance of this License is intended to apply and the License as a whole is intended to apply in other circumstances.

E. If the distribution and/or use of the Database is or becomes restricted in certain countries either by patents or by copyrighted interfaces, Multum may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.
